

## St. Mary's Parish Available Parking Areas

We have good news! After a few weather delays, our contractor is making progress with construction and will need to move the fencing to begin footings and foundation for the whole footprint of our Campus Connection Project! They assure us we should see great progress in the weeks ahead.

### **What does this mean to us?**

We will need to adjust our parking for church and school activities. Dan Carr and his **Parking Ambassadors** will be available for all Masses to direct traffic make the best efforts during construction to encourage strong attendance. Please see Site Map on other side that identifies the surrounding available parking areas:

Our **Handicap Ramp** will be accessible throughout construction.

We encourage you to reserve the spaces **along the Rectory and immediately behind the church for Restricted Mobility parking**. If you park behind the church, please note that we have placed cones to enable those parking along the church to back-up and exit the same way you entered, turning behind the rectory to Pent Road.

The town of Simsbury has indicated that we can park in the **Town Hall parking lot** on weekends and there are many spaces there to choose from. Additionally, we have 9 space around the Parish Office building at **3 Massaco Lane**. If you park in these lots, please be cautious crossing Hopmeadow Street in one of the two crosswalks.

Parking is also available in our **North Parking Lot**.

Thank you for your patience and understanding as we keep our 'Eye on the Prize'!
